

Introduction to Corporate Services

What is Google Workspace?

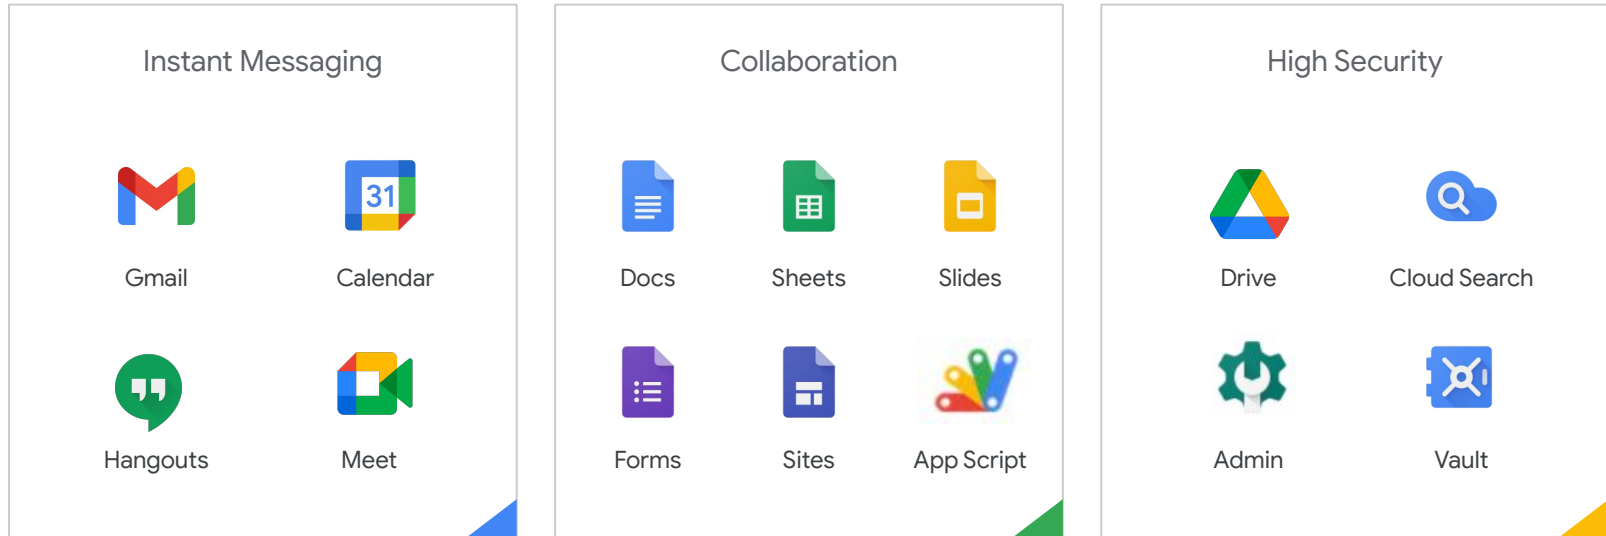

Try the work mode of Google Workspace right away

A set of multi-Google cloud services for enterprises, click on the video to get a full demo.

Google Workspace is a cloud office package dedicated for enterprises.

It's a collection of work tools that can be executed smoothly through computers, mobile phones and tablets, in order to create a mobile office for the highest productivity.

Google Workspace is much more than just an inbox for corporates.

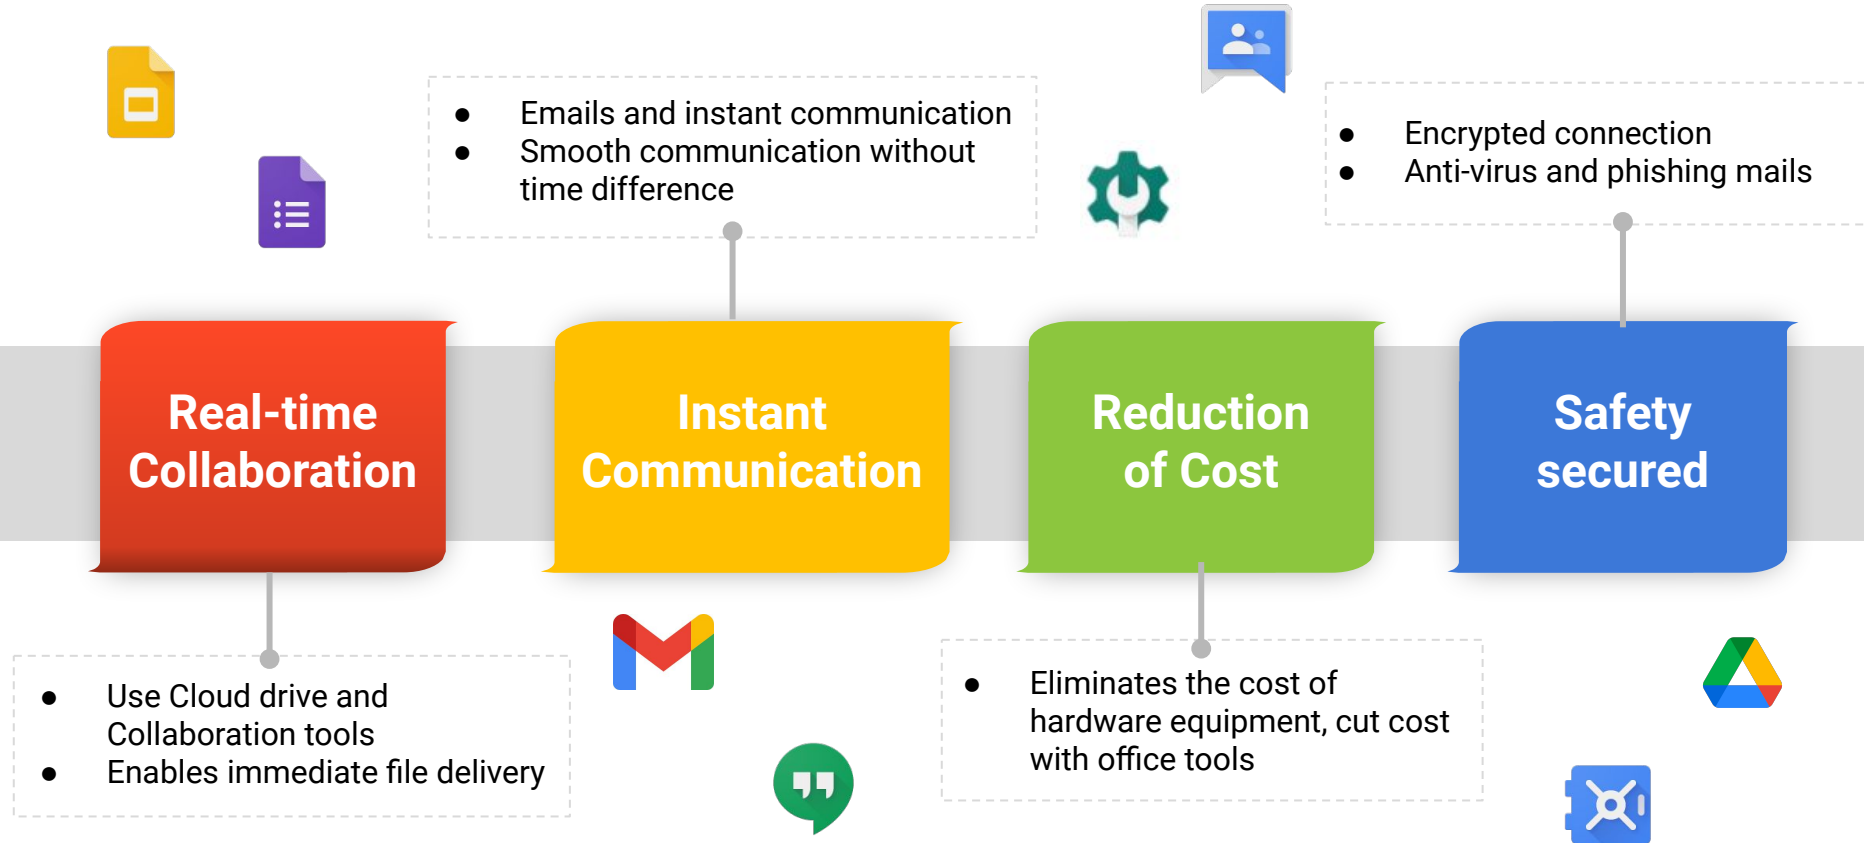

Employees can collaborate with colleagues around the world in brand new ways. They can focus on performing meaningful work and making it easier to access relevant resources.

Striving for a brighter future through Google Workspace

- Employees increase productivity through collaboration tools
- Reduction of cost for communication through the relevant tools
- Cloud services save the cost for the maintenance of hardware
- Google helps you with any safety issues

Google Workspace integrates needs in office for corporates

A better choice of corporate files storage

Hardware host for file storage

- The capacity is expanded with a large amount of money
- Access to files only on work computers
- Hardware has a limited life and personnel maintenance required
- High possibility of having a virus

Sharing of files using Google drive

- Unlimited storage space
- Internet banking as secured as encryption connection
- No risk of virus
- Can be saved and retrieved from devices

Storage of files with USB

- Limited storage space
- Leaking of company information if it's lost
- High risk of virus and infection

High security and stability
A smooth operation of **99%**
is guaranteed.

We all know how important stability is!

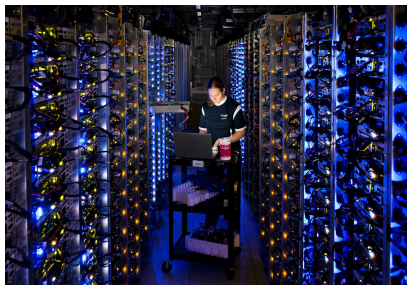

[Google Workspace SLA](#) puts you at ease when
using it

. We guarantee you a 99% smoothness of
operation all year round.

All services encrypted

All content is automatically encrypted through one or more mechanisms, the client does not need to take any action.

A safe global network

Google's global network connects to the world's ISPs, reducing the number of hops on the public Internet to increase security.

A photograph of a modern office interior. In the foreground, a man with glasses and a beard, wearing a purple plaid shirt, sits on a light-colored sofa, looking at a laptop. Next to him, another man with glasses and a beard, wearing a blue sweater, sits on the same sofa, looking towards the camera with his hands clasped. A woman with red hair is seen from the back, gesturing with her hand. In the background, other people are working and talking. The office has large windows, a staircase, and modern lighting.

Introduction of

Google Workspace functions

Communication and collaboration

- Stable mail server with a built-in filter
- Instant messaging with cloud hard drive to share files quickly
- Video conferencing can be held at any time without installing software
- Online collaboration tools can accelerate progress
- Project scheduling and management of sharing resources

**No matter where you are
You can always communicate and collaborate**

Storage and control

- *Unlimited storage space
- *Unlimited verification of emails and files
- More efficient way to look for information
- Transfer of files for resigning employees
- Services with high security and stability

**A high-quality service maintained by Google
with 99% normal use all year round.**

What will be the changes in my work after introducing Google Workspace?

Planning of projects

Sharing of files is much easier with personnel from other departments! The collaboration feature makes the discussion of the team more productive and increases the workflow by 50%. Possible to conduct meetings through your mobile device at a business trip, without asking all employees to meet.

IT personnel

Services provided by Google Workspace are very stable, helping users solve 2 times of their problems. Large storage space, with filtering of spams and mails with viruses. No need to spend time setting up a spam host. It saves the trouble of maintaining hardware and regularly updating the host. There's more time for more useful work for the company.

Management of the company

There's no need to spend time on hardware and communication. There's more time to focus on your work and improve your output. Emails, documents, file access, etc. are recorded on the Cloud, and the company's important assets are secured more safely than in the past. Handover of files is done directly through the cloud settings, solving the problem with incomplete data transfer in the past.

Different people's opinions
after introducing
Google Workspace.

Operators

Significantly reduce cost of hardware, cost of management and labor costs. The overall efficiency of the company is improved!

Managers

Management is much easier, they can focus more energy on effective plans!

Other staff

Save time for communication, more time to achieve other things!

Powerful collaborative tools help employees to finish important tasks!

With the collaborative tools,
employees spend one or two hours
less on the same tasks ¹

**With the same salary, employees
can have 8 hours in extra per
month!**

TS Cloud client's experience...

"Google Workspace helps saving more than one million in conference devices, and the store can also access cloud files with POS computers."

As the retail industry with stores in all parts of Taiwan, the Japan Medical Co.,Ltd uses Google Workspace cloud tools for store management and internal communication operations. By using Hangouts to communicate with manufacturers, the stores successfully saved more than one million in conference equipment.

TS Cloud client's experience....

"Google Workspace cloud collaboration tools have helped staff improve on 50% of the workflow!"

After transferring to Google Workspace, Decl has not only used Google's cloud collaboration tools to replace the traditional office software, which cut down on the time for collating and organizing files, but the employees are also actively using Google group cloud drives, as well as tools like Keep and Tasks to further improve on their workflow and raise efficiency in communication.

TS Cloud client's experience...

"Google Workspace is the best email system for the working on the go, and we've not received spam mail in more than four years!"

After more than four years of using Google Workspace, Noporvis has not only resolved the issue of working on the go, and has also eliminated disruptions from spam mail through Gmail's spam filter function. In addition, the use of Google cloud collaboration tools also allows its employees to work on common files regardless of their department and complete their tasks more quickly.

TS Cloud client's experience...

" Without MIS staff, you can also find a professional team to complete all Google Workspace settings within 3 hours! "

As a travel service industry, Edison Travel Service Co., Ltd pays special attention to the stability of the mailbox because they need to communicate with foreign customers immediately. Since the help of the TS Cloud to complete the activation settings, the mail server has been converted to Google Workspace, and the problems of insufficient storage space and customers not receiving mails has been successfully solved.

95% renewal rate of our clients.
We look forward to serving you!
